

# WALKING THROUGH A PIECE OF PAPER

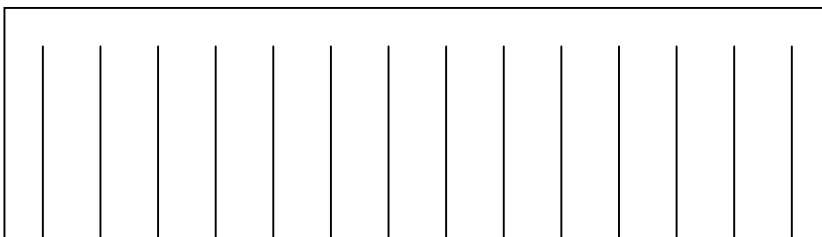

**Items needed:** An 'A4' piece of paper; ruler; pen; scissors.

**Trick:** Show your audience the piece of paper and say you are going to walk through it. Using your scissors, cut a hole in the paper and walk through it.

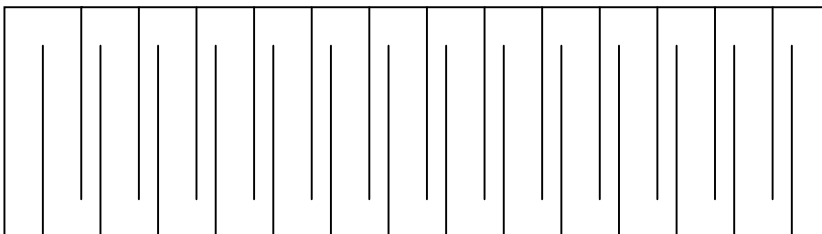

**How it's done:** Using your ruler and pen, draw on the back of the piece of paper the lines in the same position as shown in the illustration below. If you carefully cut along these lines the paper can be opened up and walked through!

1. Cut a line down the centre of the paper being careful not to go over the edge.

2. Fold the paper along this line and cut the lines as shown.

3. Then cut between each of the cuts you have made.

4. Then open up the sheet of paper to its 'A4' size. Very carefully open it up and walk through!
