## Introduction

**A**s an institution offering a comprehensive range of programs, the University College of the Fraser Valley (UCFV) supports research and scholarly activities in a diversity of fields and topics. At the same time, as a regional post-secondary institution UCFV nurtures a unique relationship with the communities it serves by offering education, training, and research programs that closely match the emerging needs of the community and the regional labour market. One of UCFV's main strategic goals is to further enhance its research, scholarly, and creative activities.

UCFV faculty, staff, and students are engaged in a significant number of research projects, often multi-disciplinary, that both enrich the learning environment of the university and contribute to the development of the region. Located in one of the fastest growing areas in Canada, UCFV has many opportunities to respond to interests and issues of concern not only to the many communities of the Fraser Valley, but to Canadian and international communities as well.

This first edition of Publications and Research at UCFV is intended to promote, encourage, and create an awareness of the many achievements of faculty, staff, and students in 2004-2005. It is also intended to serve as a source document in responding to inquiries about publications and research undertaken at UCFV.

Contact information for individuals listed in bold can be found at [www.ucfv.ca/ASP/td2/](http://www.ucfv.ca/ASP/td2/) or for more information on UCFV departments, see [www.ucfv.ca/Programs\\_and\\_Departments.htm](http://www.ucfv.ca/Programs_and_Departments.htm).
