## Introduction

At UFV, teaching, research, and service to the community are essential and interrelated elements of our mission. This seventh edition of our annual catalogue of research publications and presentations of our faculty and students demonstrates once more how active our colleagues are engaging in research and communicating their findings. Our faculty members are committed to the integration of research and teaching and they are constantly looking for practical ways to create new research and learning opportunities for our students, the foundation of our students' academic success. This year, the catalogue is organized in a manner that allows the reader to identify more easily the contribution of our students to our collective research production. I hope that you will appreciate this small improvement.

As usual, the publications listed here cover a wide variety of disciplines and topics and, in many instances, reflect new and interesting collaborations across disciplines. UFV faculty and students are committed to conducting research of the highest quality, meeting or exceeding scientific and professional standards. This catalogue is intended to highlight their activities and achievements in 2010-2011. It is also intended to help inform our communities and colleagues about the research undertaken at our university.

If some of the titles listed stimulate curiosity, I invite you to contact our faculty members directly and find out more about their work and the work of their students.

Yvon Dandurand  
Associate Vice-President  
Research and Graduate Studies
