

## **UFV Senate Nominee – Alycia Bradley**

1. 4<sup>th</sup> year Bachelor of Science student, working towards a Major in Biology and Minor in Kinesiology. My expected graduation date is Fall 2013.
2. Beyond a professional student, I have been a UFV Biology Lab assistant for the past 2 years and a Senior Sales Associate at the Vancouver Aquarium since May.
3. I am involved with multiple facets of the university:
  - Current student representative for the Senate and the Undergraduate Education Committee (UEC)
  - Vice-president and one of the founding members of the Pre-med Student Association (PMSA)
  - Orientation Team Leader for Fall 2012
  - Member of the Student Leadership Institute
    - Involved in latest Student Leadership Retreat
    - Planning Committee member of “Building Anti-Racist Communities”
  - Volunteer for numerous events held by the Science Center, such as:
    - Student panellist for high school student’s “transition to university” events
    - Volunteer for “Opening the Doors to Science” event
    - Volunteer for upcoming “Early Applicant Orientation”

I am also involved with various activities outside of the university:

- 3<sup>rd</sup> year leader for a Sun Run training clinic, Encouraging and preparing participants to run 10km
  - 3<sup>rd</sup> year as Volunteer and Certified Counsellor with Options For Sexual Health
4. My future interest includes medical school where I hope to specialize in Obstetrics and Gynaecology (OB/GYN) in either the MD or DO program.
  5. Although I have not personally published any work, I have been nominated and featured in the 2009/2010 and 2011/2012 Student Leadership Magazine. A friend and I were also featured on the front cover of UFV’s Cascade Newspaper (Friday October 22<sup>nd</sup>, 2010) for our environmental efforts in diving to clean-up a local lake.

**UFV has been greatly integrated into my life over the past four years. I believe the senate provides an opportunistic atmosphere that supports profound change in the lives of my student colleagues, future generations of the university, and the learning environment in which everything is accomplished.**

**As a current student representative on the Senate and UEC, it has allowed me to present an opinion that is a valid representation of the student body—especially our large science community— assisting towards these positive objectives.**

**If given another seat on the senate, for August 2012-July 2013, I will continue engaging in decisions that always focus on the common goals of the students and university—ensuring that UFV remains a sensible option for potential students and faculty alike. Furthermore, highlighting that alumni are competitive applicants when applying to continuing education and graduate schools at larger institutions and world-wide.**
