

Jen Gallant

Nominee for Board of Governors

- I have a diploma and work as a Certified Dental Assistant and am currently working on a biology degree.
- I have not served on any university committees yet, have no other business or professional interests, nor do I have any publications.

My interest in the Board of governors was piqued as my desires to volunteer and become more involved in the University of the Fraser Valley converged. Because I am interested in becoming a business owner, the opportunity to serve on a board that oversees administrative matters for a large entity is appealing. I also know that I would be able to contribute to the university by serving on the Board of Governors as I collaborate with the SUS and other student organizations.
