

I put my name forward in the Senate's "Staff" category, which encompasses all UFV employees who are not either teaching faculty or university "officers". As an International Project Officer ("Academic Support Faculty") my responsibilities at UFV involve educational and international partnerships and programs that span the institution. I work with staff from every area of UFV, and recognize that the work of staff is critical to every initiative that is undertaken. The decisions made at Senate affect staff, and staff employees have an important contribution to make to all discussions of new programs and policies. I intend to represent staff members from every area, and contribute the perspective of staff in Senate and subcommittee meetings. My extensive experience at various levels in the BC post-secondary system has given me a keen understanding of staff interests and how we support educational programs.
