

Kabirpal Singh Gill

1. I am taking business degree program (bachelors of business administration)
2. I am not employed right now
3. No previous offices
4. Well as u know that I have been taking a business course here at UFV, so i just want to complete my degree first and then pursue my "CA" (chartered accountant) degree

Well as a student of UFV, what bothers me the most is that there has not been any communication between the students and the faculty as such when it comes to framing the academic polices related to the students. The students are the main frame builders of their own future and they recently have not had a say in the policies that are forced upon them. I came here at UFV and i am an international student but i have not had anyone talking to me about anything. so, if elected, as a senate member, i would make it a point to act as a bridge builder between the students and the faculty and make sure that the policies reflect the board as well as act as a reflection of the students.
