

To all UFV Students,

My name is Kamal and I am currently completing a bachelors of Science degree with a major in Biology and a minor in Kinesiology here at the University of the Fraser Valley.

In regards to my occupation, I work for a B.C Ministry of Education associated tutoring company called Interactive Learning Ltd. My role as a tutor is to aid students with upper-level mathematics, chemistry, and biology. I also work for a family-owned business as a computer technician. My job entails finding computer-related solutions for those who are having technical difficulties. More specifically, I remove malware, set up home networks, and install software.

My other professional or business interests include volunteering at various organizations in my community. I am currently the Leading Volunteer of the Emergency Department at the Abbotsford Regional Hospital and Cancer Centre. I am also involved with the Big Brother Big Sisters School Mentoring Program where I am committed to providing children and youth with my friendship, which I believe is vital in fostering their full potential to succeed. In addition, I plan to continue my volunteering overseas in an underdeveloped country by teaching the basic sciences, mathematics, and physical education to children who would otherwise not have access to an education. My hobbies include swimming, running, playing soccer, resistance training, educating, and research. In the near future, I plan to compete in the 10 km Vancouver Sun Run, get involved in meaningful basic science research at the University Fraser Valley, and tutor organic chemistry.

I want to accurately represent the views of the entire student body here at the University of the Fraser Valley. I want to be the link between the student body and the university administration through effective collaboration with faculty, student organizations, and most importantly, the students themselves. If I were given the honor of serving on the student senate, my goals would be to advocate changes in the campus community, to create an open line of communication between the students, administration, and executive boards, to maintain an unprejudiced opinion while representing UFV as a whole, to help encourage cultural acceptance, attentiveness, and involvement in our everyday lives, and to educate the students of UFV on college life and beyond.

Thank you and I appreciate your support,

*Kamal Moghrabi*
