Statement:

It has been a pleasure serving on Senate and before that University College Council for the past 5 years, as we've been dealing with the transition to a Teaching focused University. There's still a lot of work to be done, and I would love the opportunity to continue working on Senate to deal with issues of our governance structure and ways in which policies can be created with broad consultation and that maintain the integrity of the University. Having been actively involved in the UFV community as a student, employee, and as an alumnus, I feel that I bring a broad perspective to the academic issues faced by the senate. I look forward to the challenges ahead.
