# **Learning Outcomes**

Upon successful completion of this course, students will be able to:

- Explain the theoretical basis of each of the various technologies.
- Determine the applicability and limitations of each technology to the specific objective of each situation and be able to develop strategies to address these issues.
- Analyze the economic and societal benefits of biotechnology and the potential problems associated with the application of each of these techniques in areas such as medicine, consumer goods, environmental protection, and agriculture.
- Critically review the most recent scientific literature on this topic.
