

ORIGINAL COURSE IMPLEMENTATION DATE: REVISED COURSE IMPLEMENTATION DATE: September 2020

COURSE TO BE REVIEWED (six years after UEC approval): Course outline form version: 05/18/2018 January 2026

OFFICIAL UNDERGRADUATE COURSE OUTLINE FORM

Note: The University reserves the right to amend course outlines as needed without notice.

Course Code and Number: ELTR 170		Number of Credits: 2 Course credit policy (105)						
Course Full Title: Electronic System Integra	ation							
(Transcripts only display 30 characters. Departments may recommend a short title if one is needed. If left blank, one will be assigned.)								
Faculty: Faculty of Applied and Technical St	Department (or program if no department): Electronics							
Calendar Description:								
Learn deployment, configuration, verification, and calibration of residential communications infrastructure and system integration technologies. Students will learn to utilize job documentation and industry standards to perform installation. Lab-based activities for students to learn about equipment installation, cable management, system calibration, and network configuration.								
Prerequisites (or NONE): None.								
Corequisites (if applicable, or NONE):	None.							
Pre/corequisites (if applicable, or NONE):	ELTR 100, ELTR 130, and ELTR 150.							
Antirequisite Courses (Cannot be taken for additional credit.) Sp Former course code/number: Th Cross-listed with: Image: Content of the content of			Specia This co ⊠ No	Special Topics (Double-click on boxes to select.) This course is offered with different topics: ⊠ No □ Yes (If yes, topic will be recorded when offered.)				
Dual-listed with: Equivalent course(s): (If offered in the previous five years, antirequisite course(s) will be included in the calendar description as a note that students with credit for the antirequisite course(s) cannot take this course for further credit.)			Independent Study If offered as an Independent Study course, this course may be repeated for further credit: (If yes, topic will be recorded.) ☑ No ☐ Yes, repeat(s) ☐ Yes, no limit					
Typical Structure of Instructional Hours			Transfer credit already exists: (See <u>bctransferguide.ca</u> .)					
Lecture/seminar hours 20								
Tutorials/workshops		Submit outline for (re)articulation:						
Supervised laboratory hours 1			No Yes (If yes, fill in transfer credit form.)					
Experiential (field experience, practicum, internship, etc.)			Grading System					
Supervised online activities			er Grades 📋 Credit/No	o Credit				
Other contact hours:			Maxim	um enrolment (for infor	mation only): 36			
Total hours 30				Expected Frequency of Course Offerings:				
Labs to be scheduled independent of lecture hours: 🗌 No 🖾 Yes Winter only (Every semester, Fall only, annually, etc.)								
Department / Program Head or Director:				Date approved:	November 2019			
Faculty Council approval				Date approved:	November 14, 2019			
Dean/Associate VP: John English			Date approved:	November 14, 2019				
Campus-Wide Consultation (CWC)				Date of posting:	January 17, 2020			
Undergraduate Education Committee (UEC) approval				Date of meeting:	January 31, 2020			

Learning Outcomes

Upon successful completion of this course, students will be able to:

- Construct and explain working of audio-visual systems.
- Select, test and troubleshoot common components and adapters of audio-visual systems.
- Construct and explain home data networks.
- Select, test and troubleshoot common components of home data networks.
- Explain and apply common integration methods (horizontal, vertical, and star/spaghetti).
- Integrate a combination of two or more audio-visual, telecommunication, data, and/or digital systems.
- Identify and select common adapters.
- Design and interpret flowcharts and block diagrams of integrated systems.

Prior Learning Assessment and Recognition (PLAR)

Yes No, PLAR cannot be awarded for this course because

Typical Instructional Methods (Guest lecturers, presentations, online instruction, field trips, etc.; may vary at department's discretion.) Lecture and Lab Work

NOTE: The following sections may vary by instructor. Please see course syllabus available from the instructor.

Typical Text(s) and Resource Materials (If more space is required, download Supplemental Texts and Resource Materials form.)

	Author (surname, initials)	Title (article, book, journal, etc.)	Current ed.	Publisher	Year
1.	Quentin Wells	Guide to Digital Home Technology Integration	\boxtimes	Delmar Cengage Learning	2009
2.					
3.					
4.					
5.					

Required Additional Supplies and Materials (Software, hardware, tools, specialized clothing, etc.)

Typical Evaluation Methods and Weighting

Final exam:	%	Assignments:	20%	Field experience:		Portfolio:	%
Midterm exam:	%	Project:		Practicum:	%	Other:	%
Quizzes/tests:	30%	Lab work:	50%	Shop work:	%	Total:	100%

Details (if necessary):

Typical Course Content and Topics

- Introduction to digital home technology integration
- Home networks design and configuration
- Installing network components and low voltage wiring
- Audio and video installation and setup
- Security and access system fundamentals
- Security system installation and setup
- Telecommunication fundamentals and installation
- Home lighting control system components and installation
- Troubleshooting integrated technology systems
