Analog Electronics Laboratory
COURSE DESCRIPTIVE TITLE

CALENDAR DESCRIPTION:

PHYS 342 is the laboratory portion of PHYS 332. Students enrolling in PHYS 342 must in the same semester enroll in PHYS 332. This course will introduce and provide the students with experience and practice in wiring and designing circuits, how passive and active circuit devices are used in circuits, and how to check the circuits by employing the electronic measuring and test equipment used in modern laboratories. The lab computers will be used to check how the actual circuits function in comparison with the computer simulated circuits.

PREREQUISITES: **PHYS 222 or PHYS 232**
Note: As of September 2011, prerequisites will change to the following: PHYS 232

LEARNING OBJECTIVES / GOALS / OUTCOMES / LEARNING OUTCOMES:

This course is designed to provide students with:
1. practical experience in constructing and testing the classroom circuits;
2. practice in using computer simulators to check and to model laboratory circuits;
3. experience of using modern electronic measuring equipment;
4. appreciation of how actual circuits can be designed to perform specific functions

Students, after successfully completing this laboratory course, will have a good understanding of the limitations and effectiveness of the classroom theory, how modern computers are used to model and test electronic circuits, and how to construct, test and design electronic circuits.

METHODS:

The lab consists of multiple prepared experiments. They are designed to dovetail with the lecture material. Additionally, there will be student designed projects. Oral presentations and seminars will be used whenever possible.

PRIOR LEARNING ASSESSMENT RECOGNITION (PLAR):

Credit can be awarded for this course through PLAR (Please check:) ☒ Yes ☐ No

METHODS OF OBTAINING PLAR:

Please see the Physics PLAR policy on the department's webpage
