

SCENT-FREE PRODUCT LISTING

UFV and the Occupational Health & Safety Office (OHSO) support the use of scent-free products by the UFV community. Many scent-free products are available at your local supermarket and pharmacy. Others are available in specialty stores.

As you look into scent-free alternatives to scented personal-care products, it's important to be aware that the terms 'fragrance-free', 'scent-free' and 'unscented' are used virtually without restrictions. They may only mean that the product has less scent than the scented version of the same product from that manufacturer.

Nonetheless, choosing products with these labels is still safer than choosing the scented versions.

The following list offers only a small sample of the scent-free products available and is not meant to be all-inclusive. If you know of another good product, let the OH&S Office know and we will add it to our list.
