Fruit Crop Production
COURSE DESCRIPTIVE TITLE

CALENDAR DESCRIPTION:

Field production of commonly grown fruit crops in British Columbia will be discussed. Topics include site selection as influenced by environmental and economic conditions, field preparation, variety selection, and cultivation practices. If time permits, the culture of some tropical fruits may be discussed. Field trips may be required outside regular hours, including Saturdays. Saturday field trips will be held in conjunction with other Agriculture department courses to provide students with an integrated overview of agriculture in British Columbia. Students should budget approximately $40 for field trips. This course is only offered in a traditional classroom format in odd-numbered years, but may be taken online at other times.

LEARNING OBJECTIVES / GOALS / OUTCOMES / LEARNING OUTCOMES:

Upon successful completion of this course, students will be able to:
- describe the general background requirements needed to grow a wide variety of fruit crops
- discuss and apply this knowledge to the specific fruit crops of economic importance to British Columbia
- describe the preparatory work toward selecting a suitable site
- describe how to prepare the land
- amend and improve land according to soil and other tests performed
- know where and how to order plant material
- select appropriate varieties
- describe several ways of planting
- describe how to implement a support structure where needed
- identify major weeds, diseases, and pests of the respective crops
- recommend appropriate fertilizer and application methodology
- cultivate the crop
- estimate yields
- describe timely and proper harvest and post harvest handling of fruit

METHODS:

Lecture, slides and video, problem solving, term paper in specific format, field tours, industry specialist guest speakers, online supplementary course materials, and discussion groups. A major all day field trip in early September will give the student a broad, practical overview of fruit production.
