LEARNING OUTCOMES:

Upon successful completion of this course, students will be able to:

- Describe models of consumer choice under certainty and uncertainty;
- Analyze costs of production and supply;
- Identify and categorize markets by their structure;
- Determine appropriate pricing and output strategies for various market structures;
- Use game theory to solve problems concerning the strategic interaction of firms;
- Discuss the role of information in markets;
- Apply economic analysis to problems in business.

METHODS: *(Guest lecturers, presentations, online instruction, field trips, etc.)*

Lectures will develop theories and apply them to problems in economics and business. There will be extensive use of graphing and problem solving. Both formal analytic analysis and the economic intuition that underlies it are used.
