Learning Outcomes

Upon successful completion of this course, students will be able to:

1. Apply basic stratigraphic skills to geological problems.
2. Distinguish between the major groups of dinosaurs.
3. Describe changes in paleogeography and its relationship to the spatial distribution and occurrence of dinosaur fossils.
4. Evaluate scientific methodologies to infer dinosaur behavior from fossils and trackways.
5. Apply the scientific method to reconstruct the paleogeography of the Mesozoic.
6. Explain the ethical issues faced when conducting scientific research into the time of the Mesozoic.
7. Evaluate the scientific theories used to explain the demise of the dinosaurs.
8. Communicate geographic concepts using various scientific techniques (written, numeric, spatial, and oral).
9. Critically reflect upon their learning from in-class discussions, lectures, and class assignments.
