COURSE DESCRIPTIVE TITLE		

CALENDAR DESCRIPTION:

This basic mathematics course provides instruction in decimals, fractions, proportion, percent, and measurement, and an introduction to algebra and geometry. Estimation and problem solving are also part of the course. Student learning issues such as "math anxiety" are addressed through individual attention and a variety of instructional approaches.

PREREQUISITES: **Math 051 or CCP department permission (assessment may be required).**

LEARNING OBJECTIVES / GOALS / OUTCOMES / LEARNING OUTCOMES:

Upon successful completion of the course, it is expected that students will be able to:

1. Estimate, compute, and convert among fractions, mixed numbers, and decimals.
2. Apply the concepts of ratio, proportion, and percent in a variety of situations.
3. Use metric measuring instruments in a variety of situations.
4. Convert between metric and imperial systems.
5. Identify basic geometric shapes and find perimeter, area, and volume of squares, rectangles, and cubes.
6. Interpret and represent data in the form of tables and graphs.
7. Simplify numerical expression (which may include positive and negative numbers) using the order of operations.
8. Perform basic operations with integers.

METHODS:

Methods will vary with the instructor but may include: mini lessons, individual assistance, group activities, assignments, demonstrations, group problem solving, math labs, and computer-assisted learning.

PRIOR LEARNING ASSESSMENT RECOGNITION (PLAR):

Credit can be awarded for this course through PLAR (Please check:) Yes No

METHODS OF OBTAINING PLAR:

TEXTBOOKS, REFERENCES, MATERIALS:

[Textbook selection varies by instructor. An example of texts for this course might be:]

Hutchison, D, Berman, B, & Baratto, S. (2007). Prealgebra: An Integrated Equations Approach (2nd Edition). McGraw-Hill Ryerson.

Instructor-developed material.

SUPPLIES / MATERIALS:

A basic four-function calculator and a geometry set (ruler, compass, and protractor) are required.

STUDENT EVALUATION:

[An example of student evaluation for this course might be:]

Weightings will vary with individual instructors but assessment methods may include the following:

- | | |
|----------------------|----------|
| 1) Assignments | 0 - 25% |
| 2) Quizzes and tests | 25 - 50% |
| 3) Mid-term exam | 20 - 30% |
| 4) Final exam | 30 - 40% |

COURSE CONTENT:

[Course content varies by instructor. An example of course content might be:]

Review of whole number operations

Review of decimal operations

Fractions

Proportion and ratios

Percent

Metric and Imperial systems of measurements

Introduction to integers

Introduction to geometry
