

ORIGINAL COURSE IMPLEMENTATION DATE: May 1994  
 REVISED COURSE IMPLEMENTATION DATE: September 2019  
 COURSE TO BE REVIEWED: (six years after UEC approval) December 2024  
 Course outline form version: 09/15/14

## OFFICIAL UNDERGRADUATE COURSE OUTLINE FORM

Note: The University reserves the right to amend course outlines as needed without notice.

<b>Course Code and Number:</b> MATH 439		<b>Number of Credits:</b> 3 <a href="#">Course credit policy (105)</a>																	
<b>Course Full Title:</b> Group Theory																			
<b>Course Short Title (if title exceeds 30 characters):</b>																			
<b>Faculty:</b> Faculty of Science		<b>Department (or program if no department):</b> Mathematics & Statistics																	
<b>Calendar Description:</b> Groups are a fundamental structure of modern algebra with many applications in the sciences. Introduces the basic examples, constructions, and theorems of elementary group theory and explores applications within mathematics and beyond.																			
<b>Prerequisites (or NONE):</b>		MATH 339 or MATH 355.																	
<b>Corequisites (if applicable, or NONE):</b>																			
<b>Pre/corequisites (if applicable, or NONE):</b>																			
<b>Equivalent Courses (cannot be taken for additional credit)</b> Former course code/number: Cross-listed with: Equivalent course(s): <i>Note: Equivalent course(s) should be included in the calendar description by way of a note that students with credit for the equivalent course(s) cannot take this course for further credit.</i>		<b>Transfer Credit</b> Transfer credit already exists: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No Transfer credit requested (OREg to submit to BCCAT): <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No (if yes, fill in transfer credit form) Resubmit revised outline for articulation: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No To find out how this course transfers, see <a href="http://bctransferguide.ca">bctransferguide.ca</a> .																	
<b>Total Hours: 50</b> <b>Typical structure of instructional hours:</b> <table border="1" style="width: 100%; border-collapse: collapse; margin-top: 5px;"> <tr><td>Lecture hours</td><td style="text-align: center;">50</td></tr> <tr><td>Seminars/tutorials/workshops</td><td></td></tr> <tr><td>Laboratory hours</td><td></td></tr> <tr><td>Field experience hours</td><td></td></tr> <tr><td>Experiential (practicum, internship, etc.)</td><td></td></tr> <tr><td>Online learning activities</td><td></td></tr> <tr><td>Other contact hours:</td><td></td></tr> <tr><td></td><td style="text-align: center;">50</td></tr> </table>		Lecture hours	50	Seminars/tutorials/workshops		Laboratory hours		Field experience hours		Experiential (practicum, internship, etc.)		Online learning activities		Other contact hours:			50	<b>Special Topics</b> Will the course be offered with different topics? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No If yes, different lettered courses may be taken for credit: <input type="checkbox"/> No <input type="checkbox"/> Yes, repeat(s) <input type="checkbox"/> Yes, no limit <i>Note: The specific topic will be recorded when offered.</i>	
Lecture hours	50																		
Seminars/tutorials/workshops																			
Laboratory hours																			
Field experience hours																			
Experiential (practicum, internship, etc.)																			
Online learning activities																			
Other contact hours:																			
	50																		
		<b>Maximum enrolment (for information only):</b> 36 <b>Expected frequency of course offerings (every semester, annually, every other year, etc.):</b> <u>Semi-Annually</u>																	
<b>Department / Program Head or Director:</b> Ian Affleck		<b>Date approved:</b> September 26, 2016																	
<b>Faculty Council approval</b>		<b>Date approved:</b> October 5, 2018																	
<b>Campus-Wide Consultation (CWC)</b>		<b>Date of posting:</b> November 16, 2018																	
<b>Dean/Associate VP:</b> Lucy Lee		<b>Date approved:</b> October 5, 2018																	
<b>Undergraduate Education Committee (UEC) approval</b>		<b>Date of meeting:</b> December 14, 2018																	

**Learning Outcomes**

Upon successful completion of this course, students will be able to:

1. Define elementary group-theoretic concepts
2. Establish elementary group-theoretic propositions and construct counter-examples
3. Construct quotient groups, perform computations there
4. Establish elementary statements about homomorphism and isomorphism
5. Compute with and establish elementary propositions about permutations
6. Employ group theoretic techniques in counting and symmetry problems
7. Employ representation techniques for finite Abelian groups
8. Use Sylow theorems to elucidate group structure based on order
9. Compute, and establish elementary propositions in the theory of one or more of the following, as time permits
  - a. Symmetry and crystallographic groups
  - b. Braid groups
  - c. Permutation groups
  - d. Series compositions of groups (solubility, nilpotency)
  - e. Infinite Abelian group theory

**Prior Learning Assessment and Recognition (PLAR)**

Yes     No, PLAR cannot be awarded for this course because

**Typical Instructional Methods (guest lecturers, presentations, online instruction, field trips, etc.; may vary at department's discretion)**

The course will be primarily lecture-based and may include student presentations.

**Grading system:** Letter Grades:  Credit/No Credit:     Labs to be scheduled independent of lecture hours: Yes  No

**NOTE: The following sections may vary by instructor. Please see course syllabus available from the instructor.**

**Typical Text(s) and Resource Materials (if more space is required, download Supplemental Texts and Resource Materials form)**

	Author (surname, initials)	Title (article, book, journal, etc.)	Current ed.	Publisher	Year
1.	A. Papantonopoulou	Algebra Pure and Applied	<input type="checkbox"/>	Prentice Hall	2002
2.	J. Gallian	Contemporary Abstract Algebra, 9 <sup>th</sup> ed.	<input type="checkbox"/>	Brooks Cole	2016
3.			<input type="checkbox"/>		
4.			<input type="checkbox"/>		
5.			<input type="checkbox"/>		

**Required Additional Supplies and Materials (software, hardware, tools, specialized clothing, etc.)****Typical Evaluation Methods and Weighting**

Final exam:	40 %	Assignments:	25 %	Midterm exam:	35 %	Practicum:	%
Quizzes/tests:	%	Lab work:	%	Field experience:	%	Shop work:	%
Other:	%	Other:	%	Other:	%	Total:	100%

**Details (if necessary):****Typical Course Content and Topics**

Groups

Basic definitions and examples

Cyclic groups, permutation groups, and Cayley's Theorem

Cosets and Lagrange's Theorem

Homomorphisms, normal subgroups and quotient groups, the Isomorphism Theorems

Direct products and the Fundamental Theorem of Finite Abelian Groups

Conjugacy classes, the Class equation, applications to symmetry and counting

Sylow's Theorems

Additional topics chosen from:

- a. Symmetry and crystallographic groups
- b. Braid groups
- c. Permutation groups
- d. Series compositions of groups (solubility, nilpotency)
- e. Infinite Abelian group theory
