**Learning Outcomes**

Upon successful completion of this course, students will be able to:

- Produce 3D assets using industry-standard tools, and practices.
- Synthesize real-world objects and surfaces in a 3D render.
- Animate objects and characters in 3D.
- Apply principles of visual organization, visual language, and theory to visual communication problems.
- Communicate narratives, dramatic information, ideas, moods, and feelings through computer-generated imagery.
- Use appropriate terminology when discussing the technical aspects of 3D digital arts.
- Identify how 3D software is used within a larger production context.
- Develop self-directed ideation, problem-solving, and project management skills.
