**CALENDAR DESCRIPTION:**

This is the middle course in the sequence 252, 352, 452. On completion, the successful student will recognize the effects of light’s constant speed on mechanics, optics and electromagnetism. The new view of space-time given by special relativity sets the stage for general relativity or Einstein’s Theory of Gravity. To do this, the student will learn the language of tensor analysis and differential form, and the use of space-time diagrams.

**PREREQUISITES:**

PHYS 252 and PHYS 222

**SYNONYMOUS COURSE(S)**

(a) Replaces: n/a

(b) Cannot take: n/a for further credit.

**TOTAL HOURS PER TERM:**

**EXPECTED FREQUENCY OF COURSE OFFERINGS:**

once every two years

WILL TRANSFER CREDIT BE REQUESTED? (lower-level courses only)

☐ Yes ☐ No

WILL TRANSFER CREDIT BE REQUESTED? (upper-level requested by department)

☐ Yes ☐ No

TRANSFER CREDIT EXISTS IN BCCAT TRANSFER GUIDE:

☐ Yes ☐ No

**AUTHORIZATION SIGNATURES:**

Course Designer(s): Rob Woodside

Chairperson: Gillian Mimmack (Curriculum Committee)

Department Head: Norm Taylor

Dean: Jackie Snodgrass

UPAC Approval in Principle Date: UPAC Final Approval Date: May 26, 2006
LEARNING OBJECTIVES / GOALS / OUTCOMES / LEARNING OUTCOMES:
On course completion the student will be able to:
1. Realize deficiencies of Newtonian space-time;
2. Understand Minkowski's geometry of space-time;
3. Apply the technique to space-time diagrams;
4. Apply Lorentzian tensors to relativise; optics, mechanics, electricity and magnetism;
5. Solve various problems in each of the topic areas listed in the Calendar Description section.

METHODS:
The course will be taught using lectures, seminars, presentations and projects. Problems will be assigned and marked on a regular basis.

PRIOR LEARNING ASSESSMENT RECOGNITION (PLAR):
Credit can be awarded for this course through PLAR (Please check:) ☒ Yes ☐ No

METHODS OF OBTAINING PLAR:
Please see the Physics PLAR policy on the department's webpage

TEXTBOOKS, REFERENCES, MATERIALS:
[Textbook selection varies by instructor. An example of texts for this course might be:]

SUPPLIES / MATERIALS:

STUDENT EVALUATION:
[An example of student evaluation for this course might be:]
Assignments 25%
Mid-term examination 30%
Final examination 45%

COURSE CONTENT:
[Course content varies by instructor. An example of course content might be:]
1. Gallilean Relativity
2. Lorentz Transformation
3. Special Relativity
4. Kinematics in Special Relativity
5. Relativistic Optics
6. Space-time and Four-vectors
7. Relativistic Particle Mechanics
8. Field Transformations
9. Electric Currents and Charge Density
10. Scales and Vector Potential
11. Magnetic Deflection of Charged Particles
12. Curved Space-time
13. Schwarchild Soln. and Black Holes
