COURSE CONTENT: [Course content varies by instructor. An example of course content might be:]
Introduction – Weeks 1 & 2
The course begins with an examination of the theoretical foundations of qualitative research, i.e., the perspectives which guide qualitative research. Topics include:
- Durkeim’s social facts
- Weber’s verstehen approach
- Marx’s historical method
- feminist and post-modern methodological critiques
- ethical concerns

Field Studies – Weeks 3, 4, 5, 6
This section of the course presents two well-established qualitative data collection techniques: participant observation and in-depth interviewing. Students will study selected articles/studies based on these methods. Students will examine the main tasks of field study: gathering, focusing and analyzing data, as well as the role of the researcher.

Alternative and Unobtrusive Methods – Weeks 7, 8, 9, 10, 11
This section of the course continues with the study of qualitative research methods: including oral narratives, documentary analysis, analysis of popular media, archival research and multi-methods approaches. Within each of these approaches students will examine the steps of data collection and analysis, the presentation of findings, and the role of the researcher. Examples of each of these approaches will be examined.

Course Summary – Weeks 12 & 13
In this section of the course, students will provide the class with presentations of their research projects. The course will conclude with a content overview and a discussion of the uses and abuses of social research.
