The University of the Fraser Valley is situated in the traditional and

- The University of the Fraser Valley is situated in the traditional and contemporary territory of the Halq'eméylem speaking Stó:lō Peoples (people of the river). Halq'eméylem is the upriver dialect and efforts continue to be made to revitalize their language.
- The Teaching and Learning Centre recognizes and honours the contribution that Indigenous people and specifically, the Stó:lō have made — and continue to make — to our community.
- Through our reconciliatory efforts to enhance educational delivery at UFV, we aim to support Indigenous learners and seek to incorporate Indigenous ways of knowing in the curriculum.

TII – Three Scenarios

1] TII Integrated inside BSP Assignment

- Check TII's similarity scores for both draft and final versions
- Submit/Grade both draft and final versions

2] TII LTI and BSP Assignment Separately

- Check TII's similarity scores for draft versions only via TII LTI
- Submit/Grade the final version via BSP assignment

3] TII LTI Only

- Check TII's similarity scores for both draft and final versions
- Submit/Grade both draft and final versions with a critical limitation (only the latest version will be kept for submission records and grading)

Scenario 1: TII Integrated inside BSP Assignment

- **Pros:**

Both students and instructors can check TII's similarity scores and submit/grade different versions in one place.

- **Cons:**

Navigation for students to see their TII's similarity scores is not straightforward.

Scenario 2: TII LTI and BSP Assignment Separately

- **Pros:**

Students can easily check their TII's similarity scores for draft versions via TII LTI and then submit the final version via BSP assignment after ironing out similarity issues.

- **Cons:**

Students might forget to submit their final versions via BSP assignment.

Scenario 3: TII LTI Only – Use This with Extra Caution

- **Pros:**

Both students and instructors can check TII's similarity scores and submit/grade different versions in one place.

- **Cons:**

Only the latest submission and its grade are kept. Any preceding submissions and grades are automatically wiped out when students submit again. Use this option with extra caution.
